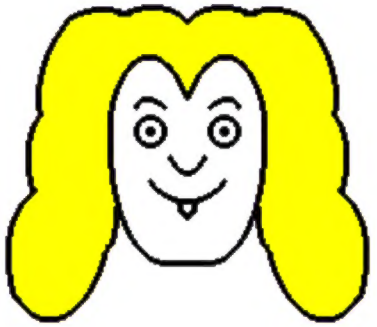
More Children Around The World



Dream, Interact, Share and Success

In their dreams, children will grow to begin through interactions.
Life is easier than in other neighborhoods.
Please support for children's life can help them.
Share love with your friends.
That would be amazing encouragement throughout the day
and more inspiration to find out the past
would unlock more future success.
Rejoice with a whole new creation.

We will share children around the world.

Vintage Sampler Collection 1996

Yomaru Says...

I discovered years of inventors like gadgets and electronic appliances. Those brought from the market and saved for remembrance and lifetime spans from many years ago. If you discover more computer models and software applications from the Personal Computer Magazine, and even you're watching "Computer Chronicles" on your American Public Television. An interesting computer model that will be seen in brochures and television advertisements. If you're interested in products, just go shopping on Sundays, and look at those electronics and gadgets inside the marketplace.

COMPACT CASSETTE

The Compact Cassette or Musicassette (MC), also commonly called the tape cassette, cassette tape, audio cassette, or simply tape or cassette, is an analog magnetic tape recording format for audio recording and playback. It was invented by Philips in 1962. This Compact Cassette with these sizes refer to the total playing time for both sides.
Durations for the following: C30 = 15 Min. e/s | C45 = 22.5 Min. e/s | C60 = 30 Min. e/s | C90 = 45 Min. e/s | C120 = 60 Min. e/s

VIDEO TAPE / VIDEO CASSETTE or VIDEO HOME SYSTEM TAPE

Videotape is magnetic tape used for storing video and usually sound in addition. Information stored can be in the form of either an analog or digital signal. Videotape is used in both video tape recorders (VTRs) and, more commonly, videocassette recorders and camcorders. Videotapes have also been used for storing scientific or medical data, such as the data produced by an electro-cardiogram. It was invented by the Victor Company of Japan in 1976. Tapes are labeled by their maximum recording time.
CAPACITY: [SP] T-60, T-90, T-120, T-160, T-180 / [LP] T-60 = 2hrs., T-90 = 3hrs. T-120 = 4hrs., T-180 = 6hrs.
[EP] T-120 = 6hrs. / T-160 = 8hrs. / T-180 = 9hrs.

FLOPPY DISK

A floppy disk or floppy diskette (casually referred to as a floppy, or a diskette) is a type of disk storage composed of a thin and flexible disk of a magnetic storage medium in a square or nearly square plastic enclosure lined with a fabric that removes dust particles from the spinning disk. Floppy disks store digital data which can be read and written when the disk is inserted into a floppy disk drive (FDD) connected to or inside a computer or other device. It was introduced by IBM in 1971.

These Format Disk Variants:

Custom formatting types on Floppy media

Commodore Amiga -The Commodore Amiga computers use an 880 KB format (11 512-byte sectors per track, times 80 tracks, times two sides) on a 3½ inch floppy. Because the entire track is written at once, intersector gaps can be eliminated, saving space.
Apple Macintosh - The first Macintosh computers used single-sided 3½ inch floppy disks, but with 400 KB formatted capacity. These were followed in 1986 by double-sided 800 KB floppies.
IBM PC Compatible | 3½" floppy drive was introduced by Sony in 1981.
| 5¼" f loppy drive was introduced by Shugart Associates in 1976.
| 360KB (5¼" DD in 1978) / 1.2MB (5¼" HD in 1984) - Drive B:
| 720KB (3½" DD in 1982) / 1.44MB (3½" HD in 1986) - Drive A:

HOME ELECTRONICS REQUIREMENTS

8MM VIDEO FORMAT TAPE

The 8mm video format refers informally to three related videocassette formats for the NTSC and PAL/SECAM television systems. These are the original Video8 (analog recording) format and its improved successor Hi8 (analog video and analog audio but with provision for digital audio), as well as a more recent digital recording format known as Digital8. It was introduced by Sony in 1984.

CAPACITY:

Video8/Hi8: 60, 90, 135 minutes (PAL-SP) : 120 minutes (NTSC-SP) | Digital8: 60 minutes (NTSC-SP) : 90 minutes (PAL-SP)

LP VINYL RECORD

It was invented in 1943, and the Long-Playing Microgroove Vinyl record was introduced by Columbia Records in 1948.
LP Record typically has a playing time of around 40-50 mins. total, with about 20-25 mins. e/s on a 12" record at 33 1/3 RPM.

COMPACT DISC

The compact disc (CD) is a digital optical disc data storage format that was co-developed by Philips and Sony to store and play digital audio recordings. It was invented in October 1982 in Japan and Europe & North America in March 1983.
CAPACITY: Audio CD and Data CD: 700MB / 80 Minutes | CD-ROM: 194 MB (8cm), 553-900 MB (12cm)

MICROSOFT DISK OPERATING SYSTEM

It is also known as Microsoft DOS or MS-DOS is an operating system for x86-based personal computers mostly developed by Microsoft. Collectively, MS-DOS, its rebranding as IBM PC DOS, and few operating systems attempting to be compatible with MS-DOS, are sometimes referred to as "DOS" (which is also the generic acronym for disk operating system). MS-DOS was the main operating system for IBM PC compatibles during the 1980s, from which point it was gradually superseded by operating systems offering a Graphical User Interface, in various generations of the graphical Microsoft Windows operating system.

WALT DISNEY CHARACTER HISTORY

The Rescuers - 06/22/1977

* Bernard - Rescue Aid Society's timid janitor, who reluctantly tags along with Miss Bianca on her journey to the Devil's Bayou to rescue.
* Penny - He is highly superstitious about the number 13 and dislikes flying (the latter being a personality trait of Newhart).
* Miss Bianca - the Hungarian representative of the Rescue Aid Society.
* Madame Medusa - a greedy, redheaded, wicked pawn-shop owner.
* Penny, a lonely six-year-old orphan girl, residing at Morningside Orphanage in New York City.
* Mr. Snoops - Medusa's clumsy and incompetent business partner, who obeys his boss's orders to steal the Devil's Eye in exchange for half of it.
* Orville (named after Orville Wright of the Wright brothers, the inventors of the airplane; most likely influenced from Bob Newhart's stand-up sketch "Merchandising the Wright Brothers") - an albatross who gives Bernard and Bianca a ride to Devil's Bayou.
* Rufus - an elderly cat who resides at Morningside Orphanage and comforts Penny when she is sad. Although his time onscreen is rather brief, he provides the film's most important theme, faith.
* Ellie Mae and Pat Buttram as Luke, two muskrats who reside in a Southern-style home on a patch of land in Devil's Bayou. Luke drinks very strong, homemade liquor, which is used to help Bernard and Evinrude regain energy when they need it. Its most important usage is for fuel for powering Medusa's swamp-mobile in the film's climax.
* Evinrude (named after a brand of outboard motors) - a dragonfly who mans a leaf boat across Devil's Bayou, giving Bernard and Miss
* Bianca - a ride across the swamp waters.

Fictional Cartoon Characters had Families or Groups:

Jonny Quest Series (1964)

-Jonny Quest- (1964)

* Jonathan "Jonny" Quest is a Tom Swift-like 11-year-old American boy who lost his mother at an early age. Although unenthusiastic in his schooling, he is intelligent, brave, adventurous, and generally athletic with a proficiency in judo, scuba diving, and the handling of firearms. He takes on responsibility willingly, attending to his homework (and/or household chores), telling the truth, and treating adults with respect.
* Dr. Benton C. Quest is Jonny's father and a scientific genius who works for the U.S. Government. He is considered "one of the three top scientists in the world", with interests and technical know-how spanning many fields. Raising Jonny and Hadji as a widowed father, he is benevolent, conscientious and decent, even though he is ready, willing and able to take decisive action when necessary for survival or defense.
* Roger T. "Race" Bannon is the special agent from Intelligence One assigned to safeguard Jonny "24 hours a day and 7 days a week as tutor, companion and all-around watchdog". Race was born in Wilmette, Illinois, to John and Sarah Bannon. He is an expert in judo, having a third-degree black belt as well as the ability to defeat notorious experts in various sporting techniques, including sumo wrestlers. He is also a pilot.
* Hadji Singh is a streetwise 11-year-old Kolkata orphan who becomes the adopted son of Dr. Benton Quest, as well as Jonny's best friend and adoptive brother. Rarely depicted without his bejeweled turban and Jodhpuri, he is proficient in judo, which he learned from an American Marine. The seventh son of a seventh son, Hadji seems to possess mystical powers (including snake-charming, levitation and hypnotism), which may or may not be attributed to parlor trickery. The Quest family meets Hadji while Dr. Quest is lecturing at Calcutta University; he subsequently joined the Quest team after saving Dr. Quest's life (by using a basket lid to block a knife thrown at the doctor). Although slightly more circumspect than Jonny, he can reliably be talked into participating in most any adventure by his adoptive brother.
* Bandit is Jonny's pet dog, so named because he is white with black markings - including what appears to be a black domino mask around his eyes. This coloration is occasionally instrumental in foiling adversaries.

-The New Adventures of Jonny Quest- (1986)

New Characters including previous mainly characters

* Hardrock
* Race Bannon

Hanna-Barbera Cartoon Characters Through History

Fictional Cartoon Characters had Families or Groups:

Frankenstein Jr. and The Impossibles (1966)

Frankenstein Jr.: Taking place in Civic City, boy scientist Buzz Conroy and his father Professor Conroy fight supervillains with the aid of a powerful heroic robot named "Frankenstein Jr." .
Buzz built "Frankie" and activated him through an energy ring. Frankenstein Jr. appears to be reminscient of the anime character Tetsujin 28-go (also known as Gigantor).
The Impossibles: The title characters are a trio of superheroes (Multi-Man, Fluid-Man, and Coil-Man) who pose undercover as a Beatlesesque rock music band. The characters' names are descriptive of their powers: Multi-Man can create identical copies of himself; Coil-Man can form into a super-springy coil; and Fluid-Man can transform his body into any fluid.
The heroes receive assignments from "Big D" , who contacts them via a receiver in the base of Coil-Man's left-handed guitar.
